  "description": "As part of Contact Center Simulations, the Customer Service Phone Solution
includes a contact center simulation and two behavioral tests designed to measure a wide range of
skills, competencies, and behavioral tendencies relevant for contact center jobs. The Contact Center
Simulation provides an opportunity for candidates to interact with simulated customers in a contact
center environment. Designed to measure a candidate's ability to listen attentively to the customer,
take ownership of customer issues, resolve issues, navigate to find information, and enter
information accurately, the Contact Center Simulation is intended to measure how a candidate will
respond in a variety of customer situations and assess the candidate's computer skills in a contact
center setting. The behavioral tests in this solution are intended to measure the candidate's
learning potential and the tendency to meet goals and work hard, even when faced with obstacles.
Collectively, the assessments in this solution measure a wide range of important skills, abilities,
and behaviors for entry-level contact center roles.\n\nPlease note that for Simplified Chinese
version the audio is available in both Mandarin and Cantonese.\n",

  "description": "Managerial Scenarios is a unique test of Managerial Judgement - an individual's
ability to decide on effective ways of handling real life situations. It consists of hypothetical
scenarios, each followed by several possible responses. Candidates rate the effectiveness of each
response, using a 6-point scale, from highly undesirable to highly desirable. It can be used for
recruitment, selection, training and development, performance management and coaching in a variety
of functions and industries.\r\n\r\nReports available:\r\n\r\nManagement Scenarios Narrative Report:
A participant focused report that contains; \r\n - Management Scenarios profile\r\n - Detailed
narrative feedback of each of the 4 scales; Managerial Judgement, Managing Objectives, People
Management and Reputation Management.\r\n - Table of scores for each of the 6 style scales; Big
picture, Delegative, One-to-one, Team, Personal recognition and Company Protocol.\r\n - Detailed
narrative feedback report (with development tips) for each of the 6 style scales.\r\n\r\nManagement
Scenarios Candidate Report: A report to share with the candidate that contains: \r\n - Detailed
narrative feedback of each of the 4 scales; Managerial Judgement, Managing Objectives, People
Management and Reputation Management.\r\n - Table of scores for each of the 6 style scales; Big
picture, Delegative, One-to-one, Team, Personal recognition and Company Protocol.\r\n - Detailed
narrative feedback report (with development tips) for each of the 6 style scales.\r\n\r\nManagement
Scenarios Profile: Displays all scores on these scales in terms of four types of norm system; T-
scores, Percentiles, Stens and Grades.",

  "description": "The Multitasking Ability assessment is a measure of one's ability to adeptly work on more than one task simultaneously, while maintaining efficiency and effectiveness when interrupted or switching between tasks. This test is a face-valid, split-screen simulation that is designed to assess multitasking ability. It captures the dynamic nature of the working environment by presenting the candidate with multiple types of items in a timed format. Candidates will be required to complete problem-solving items that are presented on one side of the screen, while at the same time attending to emails that are presented within an email inbox on the other side of the screen.",

  "description": "The SHL Occupational Personality Questionnaire, the OPQ32, is one of the most widely used and respected measures of workplace behavioural style in the world. It sets a high standard of measurement excellence, providing HR professionals and business managers with relevant and accurate information to make fast and well-informed people decisions. The OPQ32 provides a clear framework for understanding the impact of personality on job performance. It is internationally recognised for its accuracy of assessment. Over 90 independent validation studies have been conducted on the OPQ over a period of 25 years, across 20 countries and 40 industries, providing concrete evidence of its power to predict performance in the workplace.",

      "description": "The PJM Report provides a clear indication of each candidate's \"degree of fit\" to a role. Provides targeted assessment results that match individuals with jobs . Links the essential/desirable competencies for a specific job with an individual's competency potential. Provides an overall Match (or fit) Score useful in ranking/sorting candidates for selection and/or development (e.g. Talent Audit). It provides a highly visual profile of a candidate's strengths and limitations against identified required competencies. Includes a summary table that enables prioritisation of action planning for development of critical competencies for an individual (by tabling Competency Potential against Job Importance for the role). It includes highly descriptive statements about a candidate's strengths and development needs/limitations. The extended report versions include proposed competency-based interview questions to enable probing of specific situations in which the candidate might have demonstrated critical job behaviours. The PJM Report is designed for use by line managers and HR professionals in selection and development situations. It is valuable for identifying an individual's overall fit as well as likely areas of strength and weakness relative to their behaviour at work. In a selection context, this information can be used: For making interviewers aware of the areas that may need further probing. As a basis for suggesting and creating relevant interview questions. For identifying the relative strengths and weaknesses of shortlisted candidates.",

  "description": "The Retail Sales and Service Simulation measures the ability of a candidate to choose effective sales and service techniques while interacting with customers. Situations are presented to the candidate via computer-based animation, and the candidate is offered a set of behaviors from which to choose the most and least effective responses. The behaviors vary in the extent to which the sales associate may: direct a conversation toward a commitment or sale, listen carefully to customers and provide options that address what they really need/want, put aside work to assist a customer, and focus on meeting customer needs. Responses are tracked and compared against expert ratings of effectiveness. The test produces an overall score, as well as scores on two subscales, Customer Service Effectiveness and Sales Effectiveness.",

    "description": "As part of Contact Center Simulations, the Sales & Service Phone Solution includes a contact center simulation and three behavioral tests designed to measure a wide range of skills, competencies, and behavioral tendencies relevant for contact center jobs. This solution is designed for contact center roles that involve sales or sales-related behaviors such as recommending products or services and retaining customers. Sample tasks for these jobs include: interact with customers on the phone to sell a product/service; add new or upgraded products or services; extend promotional or retention offers; respond appropriately to customer objections; navigate to information menus to assist the customer and process information; and type information quickly and accurately. Potential job titles that use this simulation are: Telesales Representative, Telemarketer, and Contact Center Representative. The behavioral tests in this solution are intended to measure the candidate's sales focus, learning potential, and the tendency to meet goals and work hard, even when faced with obstacles. Collectively, the assessments in this solution measure a wide range of important skills, abilities, and behaviors for entry-level contact center roles involving sales or sales and service.",

"description": "This test measures speed and accuracy in typing text presented on the computer screen. In this assessment, the text original is displayed directly above the area in which the test taker must enter the response. The test taker will not need a printed original for the evaluation. This test calculates a score based on the total number of keystrokes, time taken, and number of errors made when typing six passages. This Split Screen Typing Test uses the following method to determine the Net Words Per Minute score: Net Words Per Minute = ((Gross Words Per Minute * Time Taken) - Total Errors) / Time Taken.",

  "description": "The Technical Checking assessment is part of the Verify suite of cognitive ability assessments. Technical Checking measures perceptual speed and accuracy. This assessment requires examinees to quickly and accurately match symbols and switches based on a given set of rules. The Technical Checking assessment is mostly non-verbal and features shapes and figures. As with all assessments included in the Verify suite, the Technical Checking assessment allows organizations to assess this aspect of cognitive ability in an unproctored setting. This assessment is appropriate for all job levels and job titles, but is especially relevant for jobs that require the ability to quickly assess the accuracy of information against a set of rules.",

    "description": "SHL 360, or the Multi-Rater Feedback System ('MFS'), provides a holistic 360-degree view of an employee by gathering feedback from the employee's manager, peers, direct reports, and/or other raters. By offering a wide range of perspectives, 360 feedback gives employees a more thorough understanding of not only their strengths, weaknesses, and development opportunities, but also their impact on others. 360-degree multi-rater assessments are based on SHL's Universal Competency Framework ("UCF"), using our proven library of research-driven competencies to provide opportunities for managers, peers, and direct reports to supply useful developmental feedback that they may not otherwise share. SHL can also offer support and training throughout the entire process, from defining objectives through interpreting and delivering the feedback. 360 feedback serves all levels and industries and is a positive and powerful addition to your performance management system.",
